SUBJECT INDEX

A

Acid rain, 10-11, 22, 26, 40, 426
  and automobile emissions, 426
  and coal markets, 40
  and gas reburn/sorbent injection, 11
Africa
  energy situation
    eastern and southern region, 452
  wood energy in, 445-68
  see also particular countries
Air conditioners
  mobile, 177-78, 197
Air pollution control
  and alternative-fuel vehicles, 390, 392
  and energy conversion, 384
  and methanol, 395-97
  prevention of significant deterioration (PSD), 20, 391
  primary ambient standards, 20
  in the Soviet Union, 472, 487
  and vehicle emissions, 165-66, 380-81, 404-6, 409-10, 413, 426
  see also Clean Air Act
Air travel, 133, 135-36, 168-69, 294-96
Alternative fuels for vehicles
  see Transportation energy
  see also type of fuel
Aluminum, 158, 337, 437
Angola
  energy sources in, 448-49
Automobiles
  downsizing of, 333
  energy use of, 134-36
  engines of, 425-44
  fuel economy of, 143-68, 213, 316, 342, 370; see also Fuel economy, Corporate Average Fuel Economy
  oil consumption impacts, 425
  ownership of, 288, 314
  use, 294-96

B

Balance-of-payments
  in Angola, 448
  European, 68-69
  US, 336-37
Bathing behavior, 278, 306
Batteries, 247-57, 412-13
  aluminum-air, 413
  hydrogen/nickel oxide, 253
  iron/nickel oxide, 251
  lead-acid, 249-51
  lithium/iron disulfide, 256-57
  lithium/iron sulfide, 256
  metal/air, 253-54
  redox, 252-53
  sodium/sulfur, 412
  zinc/bromine, 252
  zinc/chlorine, 252
  zinc/nickel oxide, 251-52
Biomass energy
  global consumption estimates, 447-48
  and technology substitution analysis, 49-50
  and the Third World, 445-68
  in transportation fuels, 386-94
  and tree growing, 455-67
  types of, 447
Boiler market, 9, 228
Botswana
  energy sources in, 449
Brazil
  biomass fuel in, 386-89, 427, 447
  refrigerator penetration in, 202
Buildings
  and least-cost energy planning, 370
  space heating of in the Federal Republic of Germany, 221
  see also Housing
Buses
  energy-intensity of, 133-34
  and flywheel energy storage systems, 265
  and particulate emission standards, 11, 398

C

California
  and manufacture of aerogel panels, 185
  and strict energy-efficiency standards, 179, 181, 182
  and strict environmental regulations, 22, 60
  and utility profits, 364
Canada
  and CFC reductions, 175
  and compressed natural gas vehicles, 403
  US natural gas imports from, 12-13
Capital outlay
  for Soviet energy, 471, 486
Carbon dioxide (CO_2) emissions, 61-63, 69, 192-93, 232, 236, 245-46, 353-54, 357-58, 361, 365-66, 379, 387, 426-28, 439, 442
Chagga farming system, 460
China
  biomass types used, 447
  refrigerators in, 178-79, 202
Chlorofluorocarbons (CFCs), 173-204
  and clathrates, 259
  and ozone layer, 175-77
  possible bans of CFC-11 and CFC-12, 199-202
  reclamation of, 196-98
  substitutes for, 178, 186
  uses of, 177-78
Clathrates, 259
Clean Air Act
  Amendments of 1970, 20
  and New Source Performance Standards, 21, 27-29
  potential reauthorization, 27
Clean coal technology, 30-32, 166, 418
Coal
  in Botswana, 449
  in the Federal Republic of Germany, 206-7, 210-11, 218-19
  liquefaction, 382
  power plants
    flue gas desulfurization of, 21
    life-extension projects, 26-27
    resource recovery from, 36
    types of, 36-39
    US environmental regulations of, 19-45
  Soviet production of, 479, 481, 486
  and technology substitution analysis, 50-51
  US consumption, 355
  and US electricity supply, 19, 42, 355
  in Western Europe, 65-68
Combined-cycle turbine systems, 10, 60

Commercial energy
areas of increased demand, 7
cogeneration and, 9
electricity consumption, 333-34
in the Federal Republic of Germany, 223-26
fuel and electricity use in, 278
GRI cooking products and, 8-9
intensity of, 279
potential of natural gas in space cooling and, 7-8
Compressed air energy storage (CAES), 261-64
Computer-aided design
and energy analysis, 339
Consumers
and alternative vehicle technology, 418
and automobile choices, 143-48, 159-61, 441
household and government, 329-30, 343
and life-styles, 273-320
and refrigerator criteria, 183, 193
willingness to pay for energy-efficiency, 356
Continuously variable transmission, 159-60
Cooking
energy use for in the Federal Republic of Germany, 221-22
GRI products, 8-9
as a leisure activity, 312-13
microwave, 289
need for improved stoves in Africa, 454, 459
with poor-quality biomass, 463-64
Cooling techniques
and clathrates, 259
and natural gas, 7-8
see also Air conditioners, Refrigerators
Cool Water power plant, 22, 38, 39, 60
Corporate Average Fuel Economy, 131, 161-62, 342
Customer-side-of-the-meter (CSOM) energy storage, 244-46, 251
Deforestation, 448, 450
DEMINEX, 207, 211
Demographics
of drivers, 138-41, 308-9, 315, 341
and household energy use, 304-7
list of factors, 282
of personnel of West Siberian oil and gas–producing regions, 120-21
of travelers, 280-81

D

Deregulation
of US energy system, 354-58
Developing countries
energy demand in, 62, 97
and greenhouse gas emissions, 61-62
oil consumption in, 98-99
refrigerator penetration in, 202
road taxes and, 78-79
Diesel
engines, 152-53, 431-32
heavy-duty engine standards, 11, 396, 398
real margins of, 76-77
taxes, 77, 85, 86, 88, 89, 209, 214
District heating
in the Federal Republic of Germany, 222, 224-26
Divisia technique, 132, 137-38, 143
Driving, 138-41, 274, 308-9, 315, 341

E

Edison Electric Institute
study of future energy demand, 301-3
Elasticity of technology, 52
Elderly adults
and energy use, 307-8, 312-16
Electric Power Research Institute
and clean coal technology, 30, 34
electric vehicle program, 248
and least-cost planning, 360
Electricity
consumption
and economic activity, 55
by sector
commercial, 333-34
industrial, 332-33
residential, 330
share of US energy, 357
generation
by coal, 19-45
in the Federal Republic of Germany, 208
IIASA projected fuels, 67-68
by natural gas turbines, 10, 60
intensity
in the Soviet Union, 478, 480
technology
in the Soviet Union, 478
Electric Revenue Adjustment Mechanism, 364-65
Electric vehicles, 244-57, 411-15
Electrolysis, 266, 408-9, 440
Electronic goods and services, 289-90, 315, 341
Elsbett engine, 434-40
End-use energy consumption US, 276
Energy conservation
in the Federal Republic of Germany, 208-10, 212-15, 217-18, 234-36
incentives for, 363-65
as a least-cost resource, 358-62
recent US, 354
in the Soviet Union, 469-70, 476-77
Energy conversion, 242-44, 383-84, 390-91, 393
Energy-intensity
and consumer goods, 289, 330
and the Divisia technique, 132
in the Federal Republic of Germany, 224
and fossil fuel price, 321, 323
GRI projected trend, 3
and imports, 337
in industrialized countries, 55
and location, 297-98
in the Soviet Union, 470-79
and time use, 298-300
and transportation modes, 133-38
of travel, 298, 317
of US commercial sector, 279
Energy storage, 241-71
chemical, 265-68
electrochemical, see Batteries
magnetic, 268-69
mechanical, 260-65
thermal, 257-60
Engines
see Vehicle engines
Environmental protection
changes in emphasis, 344, 353
and CO_2 emissions, 365-66
cost for coal plants, 39-40
in the Federal Republic of Germany, 217
global view, 43

integrated environmental control, 36
and methane, 58
and petroleumlike fuels, 383
and risk management, 23, 25, 29
in the Soviet Union throughout, 470-71, 487
in West Siberia, 126-28
and strong magnetic fields, 268
in the Third World, 446
training and education, 41
US laws, 19-20
